Contact No: 9811826264

We thank you for your interest in the Kleenoil Range of Filtration Products.
Please attached below proposal and Technical & Commercial Specification for your kind reference.

1. Oil Filtration System with magnetic Filter

*Filter cost
Rs. 2950 each*

4 stage machine

Model No: Kleenoil SMFS 2XSDU9788 with Magnetic Filter

Technical Specification

Filter Elements:

- Kleenoil Filter Cartridge SDC/1888 (<1 Micron, 1.2 ltr each Absorption of moisture)
- 600 Micron Mesh Filter
- **Kleenminimag Magnetic Filter**

Gauge & Switches:

- Pressure Gauge
- Pressure Switch
- Control Electric Panel
- Hour Meter
- Voltage Meter

Pump Specification:

- 0.5 HP
- 1450 RPM/415 Volts/50HZ
- 600 LPH
- Three Phase
- Rotary Gear Pump

Spares Accessories:

- Suction & delivery Pipe 3-3 meters

Warranty:

One year from the date of Invoice

*Disassemble with
Mr Ved Parkash
on 23/3/2023 and
Agreed the above
Review
25/3/2023*

Dear Sir,

Thank you for your below email inquiry.

We refer to the discussion of our GM Sales Mr Bed Parkash had with you regarding Kleenoil Micron Filtration System with Magnetic Filter.

As discussed, we are offering price for below mentioned :-.

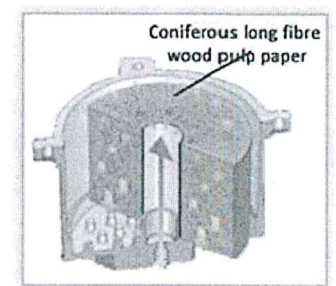

- Kleenoil Static Micron Filtration Systems SMFS 2XSDU/9788 with Magnetic Filter-1 No'
- Kleenoil Static Micron Filtration Systems SMFS 4XSDU/9788 with Magnetic Filter-1 No's

If you have any query, you may please contact us.

looking forward to receiving your valuable purchase order.

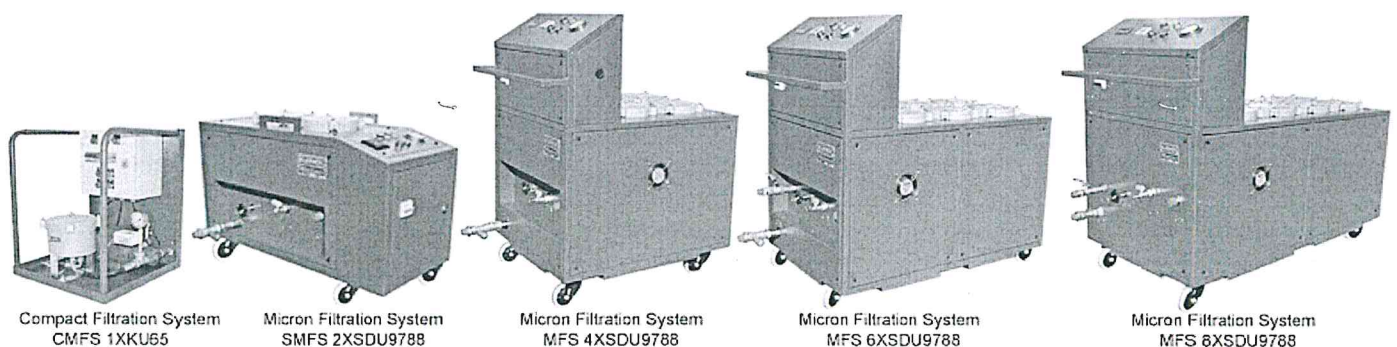

At Kleenoil we have been in the business of Hydraulic Oil / Gear Oil / Turbine and all industrial oils since 1984. Kleenoil being a global brand with its presence in over 28 countries is a leader in filtration systems and is ISO 9001 certified.

For your reference and knowledge, we would like to attach a few testimonials and case studies on our achievements in the field of oil filtration.

- The Kleenoil Micron Filtration System[®] is based on the principle of **In-Depth media filters** which allows fluid to flow through the layers of the Coniferous wood pulp paper.
- The long fibres of the paper attract the water, which arrives either through the combustion process or by condensation, and absorb it like a sponge, at the same time rejecting the larger oil molecules, which are forced to pass between the tight windings of the cartridge.
- As the oil passes through the cartridge minute carbon, wear metals and dust are extracted from the oil by adhering to the many surfaces of the filter- a process known as adsorption
- The Coniferous Media filters & filter cartridge operate upon a principle of **Absorption and Adsorption**.
- The cartridges filter particulate contamination to levels equivalent to **NAS 1638 class 6**

A few of our models

Hence the Kleenoil Micron Filtration System :

- Removes contaminant particles down to less than 0.5 microns
- Removes water up to capacity of cartridge through "Absorption process".
- No machine downtime as oil is cleaned continuously while machine is in operation
- There is no storage tank and oil is cleaned instantly
- The only consumables are the filter cartridges which can be changed within minutes.
- Can be used with virtually any petroleum/synthetic based oil
- All properties of oil being cleaned are maintained

Please find attached hereto our latest e-catalogue, for your ready reference and follow the link:

<https://www.youtube.com/watch?gl=US&v=8Tq6mjeE5OE> for a live demo of the KLEENOIL Filtering Efficiency.

If you have any additional queries, please don't hesitate to contact us.

Dear Sir,

Greetings of the day.

Thank you for connecting with us.

This is with reference to the subject mentioned above.

Please find attached the following:

1. Company Profile - Klassic Klarol Filters Pvt Ltd
2. Quotation of Klarol Hydraulic Oil Cleaning Machine.
3. Technical Specifications of the above quoted machine.

We are looking forward to working with you.

Thanking you,

Regards,

Siddhartha Tripathi
