

PERFORMANCE SPECIFICATIONS OF PURCHASED PRODUCT

A1 1 1 - 1 1			
Aluminium Foil 1235-Fully Soft	Reference	ALF/01/01	
	Aluminium Foil 1235-Fully Soft	Aluminium Foil 1235-Fully Soft Reference Number	

SI. No	Parameter	Unit	Reference Standard	Standard Value	Tolerance
1	Application	-		Flexible Packaging. including Retort Packaging	-
2	Physical Appearance		7.	Foil to be free from creases, wrinkles, folds, objectionable odour, sagging, oxidation marks, scratch marks, dust, physical contamination and stickiness	-
3	Width	mm		As per Purchase Order	+2, -0
4	Roll Weight	Kg	-	As per supplier's challan/packing slip As per Po tod.	+1, -0
5	Thickness	microns	2003	As per the Purchase Order	± 5 %
6	GSM	-	-	Value as determined by considering the density as 2.70 for Al. Foil	Spot ± 5 %
7	Wettability	Dynes/cm.	ASTM D 5725	Both side 72 dyne/cm 72 dyny - width <td>Avg. <u>+</u> 3 % min.</td>	Avg. <u>+</u> 3 % min.
8	Tensile Strength	kg/cm. Sq.	ASTM E 8	550 (For 6.5 to 9 micron thickness) - or 650 (For above 9 micron thickness) - for above 18 mgc	min.
9	Elongation	%	ASTM E 8	1 % (For 6.5 to 9 micron thickness) 2 % (For above 9 micron thickness)	<u>+</u> 0.5
10	Alloy	-	ASTM B 479	AA 1235	-
11	Temper	•	- 1- 1	'o' (fully Soft)	*
12	Finish	-		Inside dull, outside bright BSD - 0 kg	
13	Pin Holes	(Nos./ Sq. meter)	ASTM B 926 IS 1\$392% 2003	600 (For 6.5 and 7.0 micron thickness) 100 (For 9 micron thickness) – 200 50 (For 12 micron thickness) – 04 10 (For above 12 micron and unto 18 micron thickness)	max.
14	Number of Joints		-	O (For above 18 micron thickness) Soldonicol 1 thickness) For a lot, 15% of the rolls may have 1 joint, 5% of the rolls may have 2 joints and balance 85% of the rolls to be free of joints. Joints to be welded ultrasonically and identified with red flaps	OK
15	Roll Diameter	mm		(Rolls of below 450 are acceptable only when required to make the quantity as per the purchase order)	+ 50
16	Core ID	mm	/-	152 OK	<u>+</u> 1
17	Identification Label CONTROLLED			Label to carry the following information: Product Description, Size, Roll Number, Gross and Net Weights, Length in Meters, Number of Joints, Date of Manufacturing, Date of Expiry/Shelf Life and Name and Address of the supplier	- 1
18	Packing Instructions	ISSUE : REV :	3 0	Aluminium core to be used with plastic core plugs inserted at both ends of the core. Primary packing of the roll to be protective plastic wrapping and bubble wrapping. The rolls to be packed in wooden box. Wooden boxes to be free of cracks and borers without any protruding nails and wood chips.	wooden plag inserted ou
19	Transportation	Approved B Date : 30	y:).8.16	Vehicle to be clean and free of any undesirable odour. No other material to be loaded in the vehicle which may cause physical damage or contamination. The vehicle to be securely covered with tarpaulin on top to protect the material from rain water and dust. The mode of loading of pallets to be suitable for unloading at destination by forklift truck/overhead travelling hoist	OK.
