

Product	Aluminium Sheet and Coils.
Customer Name:	Vishala Glazers Private Limited - Chennai
Specification	2 mm Plain Sheet x 1220 mm Width x 3050 mm Length
Alloy	8011
Temper	H - 18
Coil OD, if relevant	Not Applicable
Coil ID, If relevant	Not Applicable
Build-up of coil, if relevant	NA
Thickness Tolerance in mm	As Per the IS Standards [+0.08 / -0.10 mm]
Width Tolerance in mm	Width Required Exactly as per our Requirement [±1.0 mm]
Chemical Composition - Alloy - 8011	Detailed chemical composition to be given or we will follow IS / ASTM standards. Okay IS 737-2008
Mechanical properties - Alloy - 8011	Detailed chemical composition to be given or we will follow IS / ASTM standards. - Okay IS 737-2008
Tensile strength (Mpa), if important	As Per ISI Standards [Above 175 MPa]
Elongation, if important	As Per ISI Standards [Min 3%]
Burr Level, if important	Not Applicable
Actual End Application of Product – Heat shield, fabrication, component, etc.	Application – For Cladding Purpose
Industry - Building & Cons, Automobile, Electrical & Electronic, Insulation, roofing etc.	Aluminium Plain Sheet will be Used in Building and Constructions Industries
Surface treatment, if not bare - Powder Coating / Anodizing / PVDF etc	Only for Powder Coating Process (Wooden Coating)
Special Packing Requirement, if any.	Standard Packing
Special Remarks, if any	Material should not have any Scratches and Burr

Any other important instructions, if any, to be followed by JAL or JAL will be following IS / ASTM standards only wherever not specified –

Material should be manufactured as per ISI Standards and as per our Requirement is 2 mm Aluminium Plain Sheet in 1220 mm Width x 3050 Length (8011 Alloy and H-18 Temper)
